PROJECTS

MoneeSplit | Budgeting App [moneesplit.com]   **August 2025 - Present**

- Built a budgeting app that tracks bills and allocates money from paychecks, improving on time payments and financial awareness.
- Designed a Figma prototype and iterated on early feedback to improve usability.
- Enhancing UI and fixing bugs while developing a secure and scalable backend with login/logout, isolating user data and maintaining privacy.

Road2Supercars | E-commerce Platform [GitHub Repository]   **November 2025 - Present**

- Built a responsive car dealer e-commerce site, allowing users to browse cars and shop efficiently across devices.
- Dynamically loaded car data via JSON and JavaScript, making updates faster and site more scalable.
- Planning future features such as advanced filtering, detailed car pages, test drive scheduling, and credit score pre-qualification.

WORK EXPERIENCE

Road to Hire | Fort Mill, SC   **October 2025 - Present**
Tech Apprentice

- Gained hands-on full stack development experience using HTML, CSS, and JavaScript.
- Led a team of 4 to deliver a non-profit website on schedule by creating prototypes and managing timelines.
- Designed and implemented web features under strict deadlines, improving time management and efficiency under pressure.
- Used Git/GitHub for version control, enhancing collaboration and reducing merge conflicts.

2c Torneria | Trissino, Italy   **June 2022 - October 2023**
Control Quality Manager

- Conducted detailed inspections and validation checks on CNC manufactured components, reducing pre-production errors by 5%.
- Collaborated with clients to clarify specifications and recommended process adjustments, improving product accuracy and satisfaction.
- Maintained documentation for quality audits, supporting adherence to technical and regulatory standards.
